

Getting better with practice? Is environmental management in the Hunter advancing?

Newcastle City Hall, 23 June 2010, 12.45pm

Featuring speakers who have been instrumental in guiding the region through more than 20 years of major environmental and sustainability challenges, this Hunter Environmental Institute (HEI) seminar will be an opportunity to hear and discuss how we are preparing for the future - what has been learnt over the last 10 years, what are the key drivers of change, and what is the best way to prepare?

Speakers will include:

Brian Gilligan Director, Hunter Valley Research Foundation; Chairman, Tom Farrell Institute for the Environment; Assistant Natural Resources Commissioner NSW; Non-executive Director, Sydney Water;

Grahame Clarke Manager Hunter North East, NSW Department of Environment, Climate Change and Water;

Kevin Young Managing Director, Hunter Water Corporation;

Fiona Marshall General Manager, Hunter-Central Rivers Catchment Management Authority; and

Barbara Crossley Director, Umwelt.

Occupying some of the most important environmental roles in the Hunter, these individuals will present a blueprint for the core elements of future sustainable environmental management in the region. They are the people that will shape how the Hunter will advance.

The key-note address during the three-course dinner will be presented by Simon Molesworth. A recipient of the Australia Medal, Simon practices law with the qualification of Queen's Counsel. His other roles include Chairman of Greenearth Energy Limited and Chairman of INTO Executive Committee. Simon is also the Immediate Past-President of the Environment Institute of Australia and New Zealand.

Price Seminar and dinner price -	
Members	\$95.00,
Non-members	\$115.00,
Students	\$75.00.
Seminar only price -	
Members	\$45.00,
Non-members	\$55.00,
Students	\$30.00;

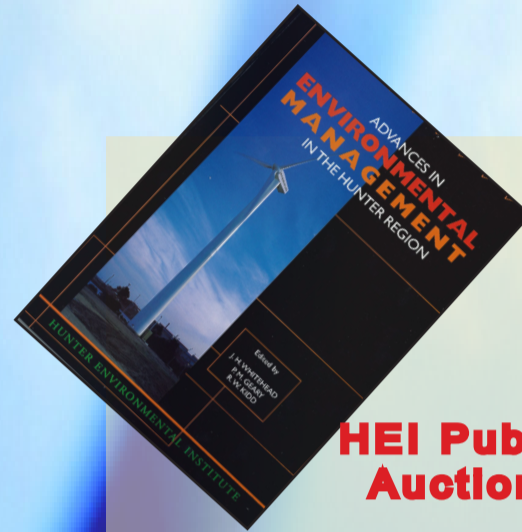

Payment before 17 June 2010 is essential.

Visit www.hei.org.au to pay.

Poster presentations are invited from practitioners in all fields of environmental assessment and management. Topics which discuss advances or the current status of legislation, approaches and the application of scientific, engineering and technological solutions to environmental issues in the Hunter are encouraged.

Forward a brief abstract to secretary@hei.org.au for consideration by 16 June 2010.

For more information about "Getting better with practice? Is environmental management in the Hunter advancing?", visit www.hei.org.au, contact the Secretary or find the Institute on Facebook.

HEI Publication to be Auctioned on eBay

In 2000, HEI published the 253-page book "Advances in Environmental Management in the Hunter Region". Including detail about water and waste water systems, biodiversity and conservation, mining and extractive industries and more, the publication has been a valuable reference for local environmental specialists for more than a decade.

Only four copies are held by the Institute, and the publication is now out-of-print. HEI will auction one copy on eBay, and will present the book to the highest bidder at "Getting better with practice? Is environmental management in the Hunter advancing?". The proceeds of the auction will assist the Institute in promoting the advancement of environmental management throughout the region.

To place a bid, find the book on www.ebay.com.au after June 12 2010
